LITHIUM BATTERIES

LITHIUM IRON PHOSPHATE POWERSPORT BATTERIES

GET Lithium-Ion batteries range features high power in reduced weight and dimensions. They have been developed following the requests of teams, mechanics and riders, including all the applications in only **two models**.

This brings important advantages: **compact range** of items to manage, **easy storage**, **higher overall performances** compared to OE batteries and **prompt crank** even under extreme conditions.

These products have been designed starting from Dirt Bikes which currently have an OEM Lithium battery installed, but they are also suitable to replace original lead acid batteries. GET Lithium batteries are manufactured with a **unique gluing technology**, which provides **insulation to the internal components** and guarantees **extended service life**, **improved starting ability** with cold weather, **outside shock absorbing** and **higher heat conductivity**.

As every GET items in our catalog, GET lithium-Ion batteries are superior products with the highest quality and reliability, born for the racers but excellent for any everyday rider.

GK-ATHBL-0003

VOLTAGE
12,8V

ENERGY
32Wh

CAPACITY
2,5Ah

CCA
175 A

DIMENSION
107x85x56 mm

WEIGHT
500 g

APPLICATION LIST (For all applications visit shop.athena.eu)
